Recommendation list for cars and installation of iZi Plus

The iZi Plus is a semi-universal child restraint system. It is approved to regulation 44.04 series of amendments for general use in vehicles fitted with 3-point belts approved to UN/ECE Regulation No. 16 or other equivalent standards.

The iZi Plus is suitable for fixing into the seat positions of the cars listed below, providing approved 3-point belt is fitted and available. Seat positions in other cars may also be suitable to accept this child restraint, however we have not yet tested that combination of car and iZi Plus seat. If in doubt, consult either BeSafe or the retailer. For updated carlist see: www.besafe.com

When the support leg is positioned on a storage compartment in front of the car seat, this compartment has to be filled up in such a way that the cover can hold the forces of the support leg. Consult the car dealer. When the floor under the floor support is insufficient to hold the forces you can not use the iZi Plus in this position of the car. Carseat positions marked with * can have a storage compartment in front of the seat.

BeSafe recommends to install the iZi Plus in all vehicle seat positions which are intended to be used and check installation, available space in the vehicle and position of the child, to verify if the iZi Plus is acceptable for your situation.

Some cars have very limited belt length. Always check iZi Plus in your car to verify if the belt length is long enough for installation. Recent model updates are not mentioned with their year of introduction. iZi Plus fits normally in later model updates of the same model.

! Notice: DO NOT use on a passenger seat fitted with activated frontal airbag.
